Google Scholar
Finding Citations and Cited by Articles
Google Scholar can generate a citation for any article you find.

Cite
Copy and paste a formatted citation or use one of the links to import into a bibliography manager.

Vancouver  Cox-Foster DL, Conlan S, Holmes EC, Palacios G, Evans JD, Moran NA, Quan PL, Briese T, Homig M, Geiser DM, Martinson V. A metagenomic survey of microbes in honey bee colony collapse disorder. Science. 2007 Oct 12;318(5864):263-7.
Google Scholar has a great feature that allows you to use an advanced search technique easily. The “Cited by” link under each result provides a list of items where the article you chose has been cited. This means, if you find one useful article, looking at other articles where authors refer back to it will probably be useful too.

Don’t forget to add JWU Library to your Google Scholar search settings to get instant access to full text. Learn how here.
